#16 — COVERED PUT

#17 — COVERED RATIO SPREAD

#18 — COVERED STRANGLE

#19 — PROTECTIVE PUT (MARRIED PUT)

#20 — COLLAR (PROTECTIVE COLLAR)

#21 — STOCK REPAIR

NEUTRAL

LONG STRADDLE

Long Straddle

Outlook

Volatility play — profit from a large move in either direction.

Max Gain

Unlimited (large move)

Max Loss

Total premium paid

Pros

Directionally agnostic  
Profits from big moves  
Useful around earnings

Cons

Expensive (two premiums)  
Severe time decay  
Needs a big move to profit

#22 — LONG STRADDLE

NEUTRAL

SHORT STRADDLE

Short Straddle

Outlook

Neutral — collects premium expecting little movement.

Max Gain

Total premium received

Max Loss

Unlimited on both sides

Pros

Benefits from time decay  
High premium income  
Good in very stable markets

Cons

Unlimited risk  
High margin requirements  
Dangerous on big moves

#23 — SHORT STRADDLE

NEUTRAL

LONG STRANGLE

Long Strangle

Outlook

Volatility play — cheaper alternative to straddle for big moves.

Max Gain

Unlimited on large moves

Max Loss

Total premium paid

Pros

Cheaper than straddle  
Directionally agnostic  
Profits from big moves

Cons

Needs a bigger move than straddle  
Time decay  
Two breakevens

#24 — LONG STRANGLE

NEUTRAL

SHORT STRANGLE

Short Strangle

Outlook

Neutral — collects premium expecting underlying to remain in range.

Max Gain

Total premium received

Max Loss

Potentially large on big moves

Pros

Higher probability than straddle  
Benefits from time decay  
Good in range markets

Cons

Large risk on big moves  
High margin  
Complex management

#25 — SHORT STRANGLE

NEUTRAL

LONG CALL BUTTERFLY

Long Call Butterfly

Outlook

Neutral — targets profit near middle strike at expiry.

Max Gain

Inner minus outer strikes - net debit

Max Loss

Net premium paid

Pros

Limited risk  
Low cost  
Good risk-reward at target

Cons

Requires precise timing  
Limited profit  
Multiple series to manage

#26 — LONG CALL BUTTERFLY

NEUTRAL

SHORT CALL BUTTERFLY

Short Call Butterfly

Outlook

Volatility trade — profits if volatility rises and price moves away.

Max Gain

Net credit received

Max Loss

Inner minus outer strikes - credit

Pros

Credit strategy  
Profits from volatility changes  
Defined risk

Cons

Complex  
Multiple commissions  
Precise execution required

#27 — SHORT CALL BUTTERFLY

NEUTRAL

LONG PUT BUTTERFLY

Long Put Butterfly

Outlook

Neutral — put-based butterfly for targeting a price at expiry.

Max Gain

Inner - outer strike - debit

Max Loss

Net premium paid

Pros

Put-based hedge  
Limited risk  
Useful in neutral markets

Cons

Precise price target needed  
Complex execution  
Limited profit

#28 — LONG PUT BUTTERFLY

NEUTRAL

SHORT PUT BUTTERFLY

Short Put Butterfly

Outlook

Neutral to directional — income strategy with defined risk.

Max Gain

Net credit received

Max Loss

Strike difference - credit

Pros

Credit strategy  
Benefits from volatility  
Defined risk

Cons

Complex  
Multiple legs  
Execution sensitive

#29 — SHORT PUT BUTTERFLY

NEUTRAL

LONG IRON BUTTERFLY

Long Iron Butterfly

Outlook

Directional — profits from a large move in either direction.

Max Gain

Outer - inner strike - net debit

Max Loss

Net debit

Pros

Directionally agnostic  
Limited risk  
Four-leg protection

Cons

Complex  
Multiple commissions  
Needs a big move

#30 — LONG IRON BUTTERFLY

NEUTRAL

SHORT IRON BUTTERFLY

Short Iron Butterfly

Outlook

Directional — profits from a large move in either direction.

Max Gain

Outer - inner strike - net debit

Max Loss

Net debit

Pros

Directionally agnostic  
Limited risk  
Four-leg protection

Cons

Complex  
Multiple commissions  
Needs a big move

CONDOR

LONG CALL CONDOR

Long Call Condor

Outlook

Directional — profits from a large move in either direction.

Max Gain

Outer - inner strike - net debit

Max Loss

Net debit

Pros

Directionally agnostic  
Limited risk  
Four-leg protection

Cons

Complex  
Multiple commissions  
Needs a big move

CONDOR

LONG CONDOR (IRON CONDOR)

Long Condor (Iron Condor)

Outlook

Directional — profits from a large move in either direction.

Max Gain

Outer - inner strike - net debit

Max Loss

Net debit

Pros

Directionally agnostic  
Limited risk  
Four-leg protection

Cons

Complex  
Multiple commissions  
Needs a big move

Outlook

Neutral — profit if underlying stays near center strike.

Max Gain

Not credit received

Max Loss

Strike width - credit

#31 — SHORT IRON BUTTERFLY

Outlook

Neutral — targets a wider range than butterfly.

Max Gain

Inner - outer strike - debit

Max Loss

Not debit

#32 — LONG CALL CONDOR

Outlook

Neutral to directional — benefits from larger moves beyond wings.

Max Gain

Outer - inner strike - debit

Max Loss

Not debit

#33 — LONG CONDOR (IRON CONDOR)

CONDOR

SHORT CONDOR (IRON CONDOR)

Short Condor (Iron Condor)

Outlook

Neutral — popular range-bound income strategy.

Max Gain

Not credit received

Max Loss

Inner - outer strike - credit

Pros

High win rate  
Time decay helps  
Limited risk

Cons

Losses on big moves  
Four legs to manage  
IV changes affect premium

#34 — SHORT CONDOR (IRON CONDOR)

CONDOR

LONG PUT CONDOR

Long Put Condor

Outlook

Neutral — put-based condor between two short puts.

Max Gain

Put strike difference - debit

Max Loss

Not debit

Pros

Put-based protection  
Limited risk  
Defined P&L

Cons

Complex  
Limited profit  
Multiple commissions

#35 — LONG PUT CONDOR

CALENDAR
